DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings were received on 9/13/04. These drawings are acceptable.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 6-9, 11, 13-15, 19, 20, 24-27, 29, 32, 33, 37-43, and 54-83 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kalevo et al (WO 98/41025).

Response to Arguments

5. Applicant's arguments filed 5/7/08 have been fully considered but they are not persuasive. Applicant asserts on pages 14-15 of the Remarks that Kalevo et al fails to disclose at least one parameter of the filtering operation is determined based on the different types of prediction encoding methods. However, Figures 4 and 5 of Kalevo et al illustrate the concept of such common parameters (e.g. D-parameters, QP, etc.) of the filtering operation 33 are determined based on the prediction encoding method 17 (e.g. see Fig. 3).

Applicant also asserts on page 15 of the Remarks that Kalevo fails to disclose adaptive filtering according to block types. However, Figure 3 of Kalevo et al illustrates the concept of

Art Unit: 2621

such common filtering operation 33 according to the different prediction blocks (e.g. intracoded block and differential block).

Applicant further asserts on page 16 of the Remarks that Kalevo et al fails to disclose filtering a block boundary dependent on a prediction method. Again, Figures 3-5 of Kalevo et al illustrate the concept of such common filtering technique dependent on a prediction method 17 as applied to a block boundary 30.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
